Gary, yes, we need to move forward since it appears that Falcon has quit on us.

Subject: Falcon Refinery

Gloria:

I think we need to have a team meeting in the very near future concerning this site. It is apparent that NORCO does not intend to do any further work on the site and wants us to take over the work with the \$ 1 million certificate of credit. If that is the case, we need to go ahead and decide on how we need to carve up the \$1 million dollars so that I can complete the removal work that they were doing. In addition, Chris Ruhl has indicated that there appears to be a butane tank on site that is leaking. There remains an ISE on this site until this waste is removed and disposed.

I think once Phillip gets back from his site visit to the site we need to

meet to determine the way forward and at least get the removal portion of the work completed.

Thanks

Gary Moore
